

HEARTS IN HARMONY

JCWWP partners with QT Medical to enhance accessibility to ECG screenings for students and young athletes.

QT Medical is dedicated to providing highly accessible ECG equipment that are accurate and efficient. Partnering with JCWWP to provide heart screenings for individuals between the ages 12-24, we provided our PCA 500 recorders and QHeart sensors, as well as continuous training and support. Through the community outreach efforts, we raised awareness for heart health. Seeing the results of our partnership, strengthened our commitment to using our technology for social good, ensuring every child has a healthy heart.
